Decision Support Center

Established on May 16th, 2016, the Decision Support Center's (DSC) objective is to support decision making in the Kingdom of Saudi Arabia and enhance its efficiency in various spheres. DSC implements scientific and pragmatic methods and means of research based on extensive data; to track and analyze current or future influencing developments and propose policy recommendations accordingly. The center also contributes to raising public awareness on governmental decisions and policies as well as emerging trends and issues.

KINGDOM OF SAUDI ARABIA

“

We will also establish a Decision Support Center at the Royal Court to support decision-making through analytical and evidence-based information and reports.

”

Vision and Mission

Vision

To be a center of excellence that improves the quality of government decisions by providing evidence-based insights and analysis.

Mission

To use global big data, advanced technologies, bright Saudi talent and international expertise to provide advice and insights that lead to better-informed decisions.

Values

Responsiveness

Collaboration

Objectivity

Excellence

Strategic Goals

To analyze local and global events, developments, trends, and their implications and propose recommendations accordingly.

To conduct futures studies that examine novelties and potential changes in various fields and propose recommendations accordingly.

To conduct research that addresses key developmental issues and propose recommendations accordingly.

To raise public awareness around governmental decisions and policies as well as emerging trends and issues.

Core Departments

Research and Advisory

Quantitative and qualitative research and analysis to conduct diagnostic studies and comparisons.

- Program examples; Economic Modeling, Behavioral Insights.

Data and Information

Builds the necessary infrastructure and technologies for collecting, processing, and analyzing big data.

- Program example; Decision Sciences Lab.

Communication and Partnerships

Builds partnerships with local and international stakeholders, such as subject matter experts, think tanks, research centers, and universities.

Partnerships contribute to the center through:

- Knowledge transfer that supports the center's research and capability building projects.
- Access to databases.
- Expanding the center's outreach.
